HEXA
A six-sided figure

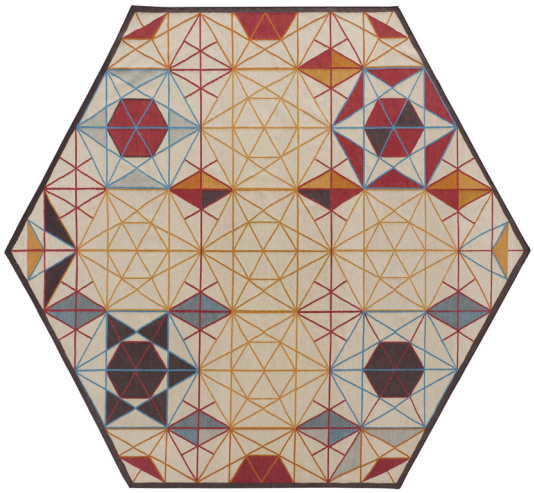

A design by Enblanc for GAN

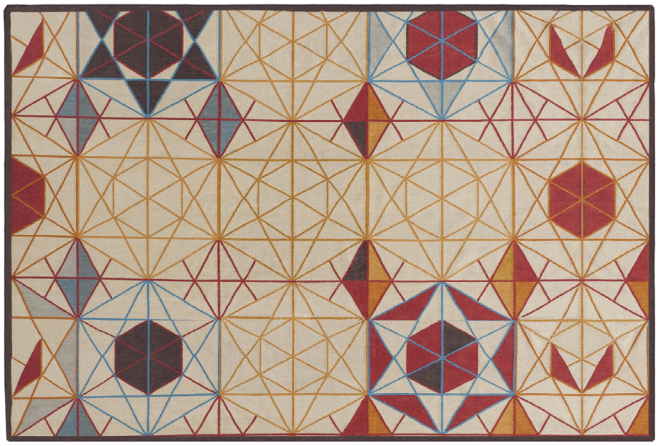

Going beyond the traditional boundaries of a rug, Enblanc design studio has created a mathematical algorithm using bright colors and neutral tones to design HEXA. It is an unmistakable piece within GAN's KILIM collection.

Contained within the shape of a hexagon, the exuberance of HEXA equally combines complexity and free expression. It is a design that catches the eye and becomes the center of attention of any interior space.
